

MITHINTI VARSHINI

+91 9121704086 | varshamithinti@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Recent B. Tech graduate in Artificial Intelligence & Machine Learning with a strong foundation in full-stack web development and AI/ML technologies. Proven expertise in building scalable web applications using React.js, Node.js, and databases (MongoDB, PostgreSQL). Experienced in implementing AI-powered features including RAG systems, LLM integration, and semantic search. Demonstrated ability to deliver production-ready code with focus on security, performance, and user experience. Seeking an entry-level Software Development role to leverage technical skills, contribute to innovative projects, and drive continuous growth within a dynamic organization.

EDUCATION

B. Tech (Artificial Intelligence & Machine Learning)

Bapatla Engineering College, Bapatla, A. P

July 2022 – April 2026

CGPA 8.90

Intermediate (PCM)

Noble Sai Junior College, Guntur, A. P

June 2020– May 2022

Percentage - 84%

Secondary School Certificate (SSC)

Scholars School, Dachepalli, A. P

June 2019 - May 2020

CGPA 10

SKILLS

Programming Languages: Python3, C, Basics of Data Structures.

Web Development: HTML, CSS, React.js, API development, responsive UI, Figma Design.

Databases: MySQL, SQLite, MongoDB, PostgreSQL.

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Chrome DevTools, AWS basics, CI/CD fundamentals, Vercel.

AI/ML Tools: Lang Chain, Hugging Face Embeddings, Chroma, Google Gemini LLM, RAG systems, vector embeddings (Chroma, FAISS)

Frameworks& Libraries: NumPy, Pandas, Matplotlib, TensorFlow, Kera's, PyTorch, NLP fundamentals

Others: Communication, Critical Thinking, Problem-Solving, Prompt Engineering

EXPERIENCE

VAULT OF CODES | MAY 2024 - JUNE 2024

- Improved and optimized AI prompts to enhance model responses for various use cases.
- Researched and Executed prompt engineering techniques to improve AI accuracy and efficiency.

RINEX AI | NOVEMBER 2024 – DECEMBER 2024

- Enhanced many real time applications by using Machine Learning algorithms and optimized AI prompts to enhance model responses for various use cases. Researched and applied how well that machine learning is being influenced by many applications these days.

EISYSTEMS PVT.LTD | May 2025- July 2025

- Enhanced some scratch to complete web applications for users to be more interactive and learn many concepts related to frontend like react.js, html, CSS and JavaScript. By using all the training, I have enhanced and tested various applications through the internship and real time also.

SOFTWARE DEVELOPMENT INTERN | Shnoor International LLC (Remote) January 2026 – April 2026

- Improved 2 full-stack web applications using React.js (frontend), Node.js/Express.js (backend), and MongoDB (database)
- Enforced JWT authentication, API error handling, and input validation; reduced authentication bugs by 100%
- Built responsive UI components with CSS Flexbox and Bootstrap; achieved 95%+ CSS test coverage on 5+ components
- Integrated third-party APIs (payment, email) using Axios and AJAX; resolved 8 integration bugs in production

- Participated in code reviews, Git workflows, and agile standups; shipped 2 features on schedule.

PROJECTS

MULTIMODAL DATA PROCESSING SYSTEM | Python, LangChain, Gemini, Streamlit

- Expanded a system to process multimodal inputs (PDF, DOCX, PPTX, MD, TXT, PNG, JPG, MP3, MP4, YouTube) using Python extraction libraries and MoviePy.
- Built a semantic search knowledge base with embeddings stored in Chroma/FAISS and integrated the Gemini LLM to answer natural-language queries.
- Implemented an optional Streamlit/HTML UI for file upload, processing, and query interaction.

PDF-BASED FINANCIAL & INDUSTRY ANALYSIS USING AI

- Built an AI system to extract, analyze, and summarize financial and industry information from PDFs.
- Used **PyPDF2** for text extraction, **Lang Chain** for text splitting, **MiniLM embeddings** with **Chroma vector database** for retrieval.
- Implemented **balanced retrieval** and **Retrieval-Augmented Generation (RAG)** techniques to provide high-quality context.
- Leveraged **Google Gemini LLM** generated structured reports covering company summaries, industry risks, economic trends, and material misstatement risks.
- Key Skills: Python, AI, LLM, Lang Chain, Vector Databases, Embeddings, RAG, Financial Analysis.

AI-ASSISTED INTERNSHIP & OPPORTUNITY NAVIGATOR

- Enhanced an AI-assisted recommendation system for personalized discovery of internships, hackathons, and learning opportunities.
- Created student profiles capturing skills, interests, and preferences to enable relevance-based matching.
- Implemented lightweight AI and rule-based ranking algorithms to score and prioritize opportunities based on skill alignment and relevance.
- Integrated time-sensitive logic to highlight closing-soon and high-priority opportunities, reducing missed deadlines.
- Delivered explainable recommendations to improve transparency and decision-making for students.
- Built a functional web prototype demonstrating personalized filtering, intelligent ranking, and opportunity prioritization using a static dataset.

Technologies: Python, Streamlit, Rule-Based AI, Recommendation Systems, JSON

Project: <https://opportune-7ehpubbp.manus.space>

FOOD ORDERING WEBSITE APPLICATION

- Engineered a responsive food ordering web application allowing users to browse menus, place orders, and complete transactions directly from partner restaurants.
- Built dynamic frontend with React.js and implemented lightweight backend services using Express.js to handle order processing and data flow.
- Enhanced proficiency in full-stack development, API integration, and cross-functional collaboration between frontend and backend systems.

ACHIEVEMENTS

-Secured **1st prize** in the **Literary Event** held for **VVIT Event** at Guntur, A.P. Awarded by the College President.

-Participated in various **literary events and competitions** organized by different colleges and earned recognition for creative thinking and public speaking abilities

EXTRA-CURRICULAR ACTIVITIES

Head Member, AWAAZ Club

- Participated in and organized literary events such as debates, creative writing, poetry recitations, and book discussions.
- Enhanced communication, public speaking, and critical thinking skills through active engagement in club activities.
- Collaborated with peers to plan events, promote cultural and intellectual exchange, and encourage creative expression among members.
- Contributed to the publication of newsletters, articles, and event summaries, showcasing strong writing and editorial skills.
